Create Automation

» It's about feeling the real benefit of technology taking care of numerous tasks for us every day.«

Thomas Moser & Martin Öller,
Founders

Loxone enables intelligent automation and intuitive control in projects of all kinds. Suitable for smart homes, commercial buildings and custom applications – the system automatically takes care of tasks relating to comfort, safety and energy efficiency. Overall, Loxone improves the way we live our daily lives following our simple call to action: **Create Automation!**

Loxone for smart homes

Loxone enables an ecosystem of components in a smart home that work intelligently together. Lighting, heating, security, blinds, multi-room audio and more all working in perfect harmony. This creates an unparalleled living environment.

There are endless benefits and reasons why you should turn your home into a Loxone Smart Home.

Here are five of these reasons:

Save 50,000 tasks. Enjoy more time for life. A Loxone Smart Home operates on its own while technology remains in the background.

All-around solution with functionality that goes beyond what you'd expect.

More security. Protecting you from burglars, potential dangers and protecting your privacy.

Save up to 50% on heating & cooling costs. Temperature is efficiently regulated and much more.

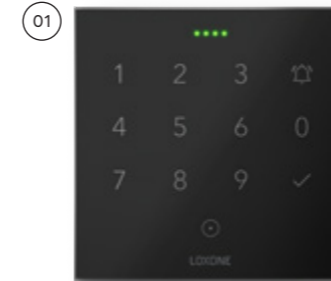

Simplest operation with just a tap to adjust your lighting, blinds and music.

01 NFC Code Touch:

Access control becomes individualized with endless possibilities.

02 Key Fob:

Access made safe and easy.

Loxone in commercial & special applications

Unique requirements for commercial automation projects are a perfect match for the Miniserver. With free scalability and open interfaces, the Miniserver is the intelligent core of any automated building. Combined with our powerful software tools, meeting any needs in any space is now easier and quicker than ever before.

Five reasons for Loxone in commercial projects and special applications:

Free scalability: for projects of all types and sizes.

Many open interfaces: from network to Dali to Modbus and more, you have almost infinite flexibility.

Powerful software tools: with the experience of 100,000+ building projects automated by Loxone.

Free & customizable visualization: made to suit your needs.

Cost-effective: low purchase price, easy installation, high reliability, no license fees.
